for its UI views. Adhering to standard practices, the interface remains consistent and stands out as the best among all POS solutions I've encountered. Notably, BitPOS has undergone continuous enhancements and updates by LiveHelp4Us. When I started development from scratch, from best design I can come up with and I have to make sure it is quick and easy to navigate.

WORK EXPERIENCE

Mar 2023 – Jul 2023

PRODUCT DEVELOPMENT ENGINEER

Channel Technologies, Inc. Makati, NCR, PH (Remote)

- Spearheaded development of custom OpenCart themes and a bespoke back-office system for ID validation and QR code generation, providing tailored solutions optimizing client operations.
- Utilized PHP, MySQL, HTML, and CSS technologies to achieve seamless integration and enhancement of user functionalities.

Aug 2022 – Feb 2023

FULL STACK DEVELOPER

Corporate Keys Group Sydney, New South Wales, AU (Remote)

- Tackled on-call system issues and integrated the Xero API for optimized report generation, enhancing operational efficiency.
- Provided critical technical support, effectively resolving platform reporting challenges.
- Developed WSL2 environment mirroring live server configuration, achieving a 100% improvement in developmental speed and efficiencies.
- Authored and distributed a comprehensive guide facilitating subsequent developer implementation.

Mar 2016 – Nov 2023

FULL STACK SOFTWARE ENGINEER

RED1 IT Florida, USA (Remote)

- Enhanced "My Core Motivations" platform by integrating APIs and maintaining AWS infrastructure.
- Implemented CI for smoother feature deployment and improved platform reliability.

Nov 2014 – Mar 2016

WORDPRESS DEVELOPER

Top Rank Software Tampa/St. Petersburg, Florida (Remote)

- Implemented key feature enhancements for Bulgaria e-commerce platform, leveraging custom WordPress plugins for heightened interactivity.
- Successfully implemented GIT for streamlined code management and conflict reduction, improving team workflow efficiency.

Oct 2014 – Nov 2015

SOFTWARE ENGINEER

Office Trueone Philippines Dumaguete City, Philippines (On-site)

- Maintained and enhanced the in-house framework with new feature implementations across backend and frontend, ensuring robust functionality and client satisfaction.
- Managed team tasks efficiently and resolved client-submitted bugs, optimizing project workflow and reducing turnaround times.

Aug 2010 – Mar 2013

SOFTWARE DEVELOPER

JSoftware Builder / W3NextApps / LiveHelp4Us Dumaguete City, Philippines (On-site)

- Installed and customized WordPress themes for client-specific needs, ensuring high client satisfaction and tailored website solutions.
- Developed 'BitPos' Local Point of Sales System in C# and PHP, enhancing transactional capabilities and retail efficiency.
- Implemented an SMS solution for E-Loading Software Station, connecting seamlessly with in-house back-office systems.
- Spearheaded theme customization for Social Engine and PhpFox Platforms, increasing engagement and usability.
- Managed and supervised client servers, ensuring optimal performance and security measures.

Apr 2009 – Sep 2009

JUNIOR SOFTWARE DEVELOPER

Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH (iTAX) Dumaguete City, Philippines (On-site)

- Developed iTAX Water Billing System for San Carlos, enhancing municipal billing efficiency and automation.
- Contributed to iWater System development by implementing new features and resolving bugs, significantly improving functionality.
- Managed database operations using Ingres and Sybase SQL Anywhere for robust data integrity and management.

CERTIFICATES

Exodus Experts – Nov 2024

MICROSOFT POWER BI

3 days online class for the Microsoft Power BI and approved in the final test. With verified authenticity code: 101634515.

PHP Innovation Award – Nov 2018

LUMEN API PURE MVC MULTI CORE FRAMEWORK

Implements the repository pattern using Laravel Lumen. The repository design pattern abstracts how objects are persisted in a storage container. This package provides an implementation of the repository design based on Laravel Lumen to store persistent objects.

PHP Innovation Award – Aug 2018

BLADE COMPONENT FACTORY IMPROVE THE LARAVEL 5.3 BLADE FACTORY

Laravel 5.3 Blade did not support components to extend template processing capabilities. This package provides a fix, making it work in applications that still use Laravel 5.3 or older versions.

PHP Innovation Award – Dec 2015

PHP JAVASCRIPT OBJECT THAT WORKS LIKE A JAVASCRIPT OBJECT

In JavaScript, the `this` pseudo-variable refers to the current object associated with a function being called. It uses the `__call` magic method to properly bind the `this` variable when calling an object closure function.

gtz / GFA Consulting Group – Jan 2009

POWERBUILDER BASICS (SAP/SYBASE)

PowerBuilder 10.5 Basics Course for iTAX developers in Dumaguete, Negros Oriental. Steven Danner (Course Instructor)
